

# Cyber Essentials

Cyber Essentials is a Government backed scheme that helps businesses protect themselves against a whole range of the most common cyber attacks. Simply being certified can reduce your cyber risk by up to 98.5%.

At UK Business IT, we inexpensively complete the entire process for you by improving your IT security so that you gain the Cyber Essentials (or Essentials Plus) accreditation. By attaining this qualification, you prove that your systems are secure and that your defences against cyber-attack are robust.

Cyber attacks come in many shapes and sizes, but the majority are basic in nature and carried out by relatively unskilled individuals. They're the digital equivalent of a thief trying your front door to see if it's unlocked. Our advice is designed to prevent these attacks.

Simply being certified can reduce your cyber risk by up to 98.5% and it's a great way to demonstrate to new customers and partners that you take cyber security seriously – helping you grow as well as stay safe.

Cyber Essentials is the basic option suitable for most organisations and then Cyber Essential Plus is a more advanced level where a hands-on technical verification is carried out.

If you would like to discuss how we can help you attain the Cyber Essentials or Cyber Essentials Plus certifications, then please get in touch.
